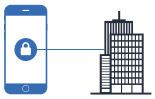
MobileIron

Enterprise Mobility Management

Mobile technology has changed the way we communicate, collaborate, and become productive in the modern enterprise. MobileIron enterprise mobility management (EMM) enables your employees to enjoy seamless access to business apps and data through secure mobile devices, desktops, and cloud services while still maintaining complete control over their privacy. This is made possible via the combination of three underlying technologies:

Mobile Device Management (MDM)



Email security

Automatic configuration

Certificate-based security

Selective wipe

Single app/kiosk mode

Mobile Application Management (MAM)

Secure apps

Enterprise app storefront

User authentication enforcement

Isolate/retire corporate apps

Mobile Content Management (MCM)

Email attachments encrypted and viewable only in authorized apps

Secure web browsers

Access, annotate and share docs

Faster Employee Onboarding. Increased Productivity.

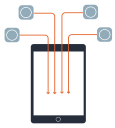
Secure and manage everything users need to be productive on any Android, iOS, macOS, or Windows 10 mobile device or desktop. If a mobile device or desktop is ever lost or stolen, or if an employee leaves the company, you can remotely wipe or retire the device.

1. Get my device

Corp or BYOD

Email / Wi-Fi, Sign in

2. Get my apps



Apps@Work: Enterprise app store

Separation between work and personal apps

3. Get my content

Docs@Work: Secure files

Web@Work: Secure browser

4. Single sign-on

Secure access

Productivity

Challenge

Securing and managing mobile devices, desktops, apps, and content using a single, comprehensive solution

Solution

MobileIron enterprise mobility management (EMM)

Benefits

- Offers on-prem or cloud-based deployment options
- Secures mobile devices, desktops, apps, and content
- Integrates with on-prem enterprise services like LDAP directory and enterprise email
- Leverages the most trusted mobile IT cloud service, with SOC 2 Type 2 audit and operational transparency

Security Standards and Certifications*

- Common Criteria Certification
- CSA STAR
- CSfC
- DISA STIG
- EU-US Privacy Shield
- FedRAMP Authority to Operate
- FIPS 140-2 Affirmation
- SOC 2 Type II

Feature Highlights

Mobile Device Management (MDM)

- Support for Android, iOS, macOS, and Windows 10
- Audit trails
- Over-the-air provisioning
- Role-based access
- User and device group-based actions
- Delegated administration
- Directory services AD/LDAP
- Certificate authority
- BYOD controls and end-user self-service
- Dual iOS MDM profiles
- Zebra Technologies ruggedized Android device support
- SAML 2.0 support
- Cisco Identity Services Engine (ISE) integration

Mobile App Management (MAM)

- Application security and access control
- App inventory – global and per device
- App catalog with featured apps, user ratings, and reviews
- App container for data-at-rest encryption
- Single sign-on for apps in catalog
- Silent app settings configuration
- App policy control to prompt install; restrict open-in, copy/paste function
- Per-app VPN with Tunnel
- Custom branding
- App reputation integration
- MAM-only option

Mobile Content Management (MCM)

- Secure content repository on device
- Selective wipe of content repository
- Policy control to restrict open-in, copy/paste function
- Silent push publishing of content to devices
- End-user notification on updated content
